MISSION #1

"Scene or Trailer"

MISSION

Target Completion Date and Time: (Friday at 6pm)

It's your condo's opportunity to be CREATIVE by creating a scene from a movie about your kingdom (theme) or a trailer providing an overview of your movie which is used to display what makes your kingdom (theme) so special! Based on what name/focus your condo has chosen, decide what you wish to include in your five minute video to be shown at the fireless campfire. You can create a montage of memories of the week, remake a show using Mammoth as your theme, or create a funny, serious, or romantic (no PDA) version of a movie, music video or more! It is preferred that you use your condo workday on Tuesday to shoot a continuous scene that requires very little (if any) editing. Your videos can be edited, however, all media cannot be captured before August7, the first day of the camp! In addition, you must be able to play the video on the main computer (bring your own flash drives, camera RCA cables, etc.). In addition, on your condo camera, you should have a confessional from each individual on your team reflecting on their Mammoth experience and sending out any final messages to anyone! The confessionals will not be shown at Mammoth and only parts may be used for the end of the year video, thus, speak your mind! A FlipCam will provided to each condo!

Furthermore, each team must keep a video log of their adventures and may also use their own cameras for a photo log for potential bonus points! Log entries into your video journal at each location you are at and be sure to get some of the scenery in. Make sure you hold that camera steady because shaky footage means shaky results. Don't forget to log those videos and capture each moment!
